Conant Map Privacy Policy

How we collect your data

If given permission from user the app will track the user's location when open. This feature is only used to determine the users location in the school. The user's location is not saved or uploaded to any server. The location information stays on the device, and is not stored permanently. If the user wants to retrieve their schedule, information that includes the user's name, student ID, and birthday will be sent to Infinite Campus servers to fetch their schedule information. Conant Map does not store this Data, but will store the students schedule until the user decides to delete it from within the app.
